### Salis  - Company Profile

VISION 2030
المملكة العربية السعودية
KINGDOM OF SAUDI ARABIA
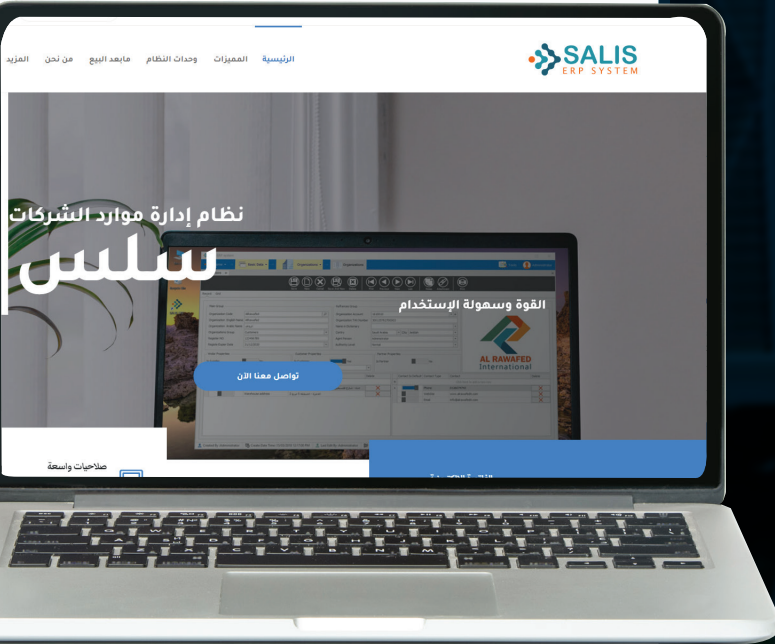

# Field of Company

SALIS is an information technology solutions provider focused on developing innovative systems to streamline business operations. Headquartered in Jeddah, Saudi Arabia, Salis was founded in 2016 with a vision to provide leading global IT solutions tailored to the local market.

# Why Salis?

**SALIS** is an Arabic word that refers to the quality of being smooth and harmonious. It also means ease and comfort.

Led by professional experts, our intelligent systems empower visionary organizations to transform ambitious aspirations into realized business outcomes – accelerating productivity, insight, and global competitiveness through:

## Tailored Solutions:

We provide customized enterprise solutions aligned to each client's specific operational needs and strategic goals.

## Seamless Integration:

Our continuous support enables the smooth integration of our solutions across your systems.

## Cutting-Edge Innovation:

We are dedicated to developing next-generation technologies that align with the evolving standards of various industries and businesses.

## Proven Methodologies:

Our processes leverage globally validated best practices tailored for local market efficiency gains.

## Future-Proof Investments:

Salis solutions are built to be highly scalable, flexible, and forward-compatible to match your growth trajectory and evolving needs.

# Certifications and Accreditations

**SALIS** upholds stringent standards of quality, security, and compliance. We have obtained accreditations from official bodies in Saudi Arabia including

هيئة الزكاة والضريبة والجمارك
**Zakat, Tax and Customs Authority**

ERP SYSTEM

# Our Mission

SALIS'S mission is to deliver high-quality, user-friendly technological products and services that reduce manual efforts and time spent on routine tasks. We provide customized enterprise solutions that introduce new possibilities through creative ideas suited to our clients' needs and objectives.

# Our Goals

## Improve operational efficiency

efficiency through advanced systems for organizing business activities and data flows, enabling data-driven decisions.

## Stimulate innovation

by facilitating information access, analytics, and process automation.
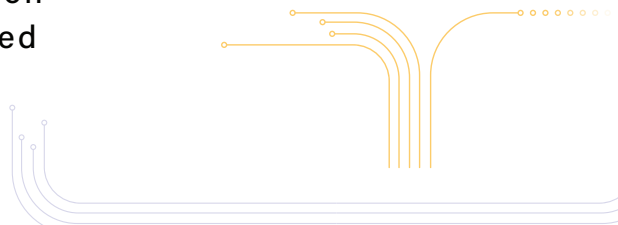

## Enhance customer experience

by providing effective self-service options, interactive communication channels, and specialized support.

## Reinforce cybersecurity

and data protection against digital threats.

# Our Values

## Respect
We value our clients' aspirations and requirements.

## Innovation
We continually upgrade systems and solutions to surpass customer expectations.

## Commitment
We dedicate resources to deliver solutions on time.

## Responsibility
Our clients' priorities come first.

# Our Team

Core to Salis' pursuit of outstanding solutions is our world-class team of highly certified IT experts. Our talent roster comprises highly qualified professional engineers with internationally recognized credentials, including MCSA and PMP certifications, and extensive experience in information technology systems.

# Our Team

Backed by decades of cumulative experience steering complex enterprise technology implementations, these specialists enable Salis to deliver on its commitment to excellence.

Led by this seasoned technical leadership, our teams operate with diligence and customer-centricity, continually refining signature platforms like the Salis ERP system through feedback. This elite group of professionals enables us to complete even the most sophisticated projects with best-in-class performance.

# Design and creation of websites and custom applications

The service of designing and creating websites and specialized applications represents one of the most important services of Salis Company, with the various factors it includes, perhaps the most important of which are:

- Determine the activity objectives, their compatibility with the brand, and design the visual identity of websites and applications.
- Analyze the target audience, and know their needs and interests, to enhance the audience's connection with the site or application.
- Ease of use, which is one of the most important factors in improving the user experience, which in turn affects the success of the site or application and includes ease of browsing and compatibility across different devices.

75%

# SALIS Applications

The company produces many applications, the most important of which is the Salis suite of applications for business solutions, which are as follows:

### SALIS Portable application for collection
It is an application that allows users to manage their collection operations, by collecting special amounts, tracking payments and indebtedness according to the age of the debt, and sending account statements.

### Distribution and sales application
It is an application that helps manage distribution and sales operations, by managing storage operations, managing customer orders with the ability to inventory, and converting price offers to an electronic invoice.

### Application of performing tasks and visiting
It is an application that allows its users to track and schedule the assignment of various tasks and activities, in addition to tracking tasks and the results of visits.

### SALIS Portable application for supervisors
It is an application that allows team supervisors to monitor and manage the daily activities of delegates, which contributes to monitoring business performance, monitoring, adding tasks, following up on invoices, and collections

### Self-service application
It is an application affiliated with the Human Resources Department, which allows direct communication between the employee and the Human Resources Department, regarding operations (inquiry about salary, leave balances, housing allowance, requests, and other human resources operations).
